

**Pittwater Animal Hospital**

We are your pet's other best friend.

## FACT SHEET

### Annual Good-Health Screen

When you bring your pet to us for his/her annual check-up and vaccination, we can now perform a mini blood profile test to give us a clearer idea of your pet's overall health. Since prevention is better than cure, the sooner any problems are found the better. Moreover, these tests allow us to establish baseline values for your pet, thus providing a useful guide for future health changes.

All it takes is a small volume of blood to accurately test organ systems for a host of illnesses that may not be detected by a physical exam alone. We learn whether your pet might have problems related to:

- **Blood sugar**
- **Liver function**
- **Kidney function**
- **Hydration**
- **Anaemia**
- **Salt balance**

Within six hours we can have the results and provide you with a copy available for your records. If there's anything else you'd like to know about blood profiling, just call us on **9913 7979**.

A final reminder. Since most animals age approximately seven years to our one, annual tests become all the more important.

**Corner of Pittwater Road & Arnott Crescent, Warriewood NSW 2102**
